

I Just Received My Bill For a Service From Last Year, Can I submit A Claim for Reimbursement?

Expenses reimbursed under an FSA must be incurred during your period of coverage under that FSA.

Expenses are treated as having been incurred when you are provided with the care or service, **NOT** when you are formally billed, charged or pay for the care or service. Depending on when your plan, you may be able to submit claim for reimbursement for prior year. Please check your plan's **run out** dates for more information.

**Orthodontia is an exception to this rule. Reimbursement for orthodontic expenses are based on date of payment, not when service is rendered.
