New HSA tools for you to use today!

Are you looking to get the most out of your Sentinel Health Savings Account (HSA)? Here are two new features of your HSA that you'll want to take advantage of before the end of the year:

1. Schedule a consultation with a Certified Financial Planner® (CFP®).

Your HSA now gives you access to schedule a one-time virtual meeting with a Sentinel Certified Financial Planner™. In this one-time consultation you can discuss the specifics of your Sentinel HSA, as well as your long-term financial planning goals.

2. Use the HSA Contribution Planner.

As you head into 2022, you can utilize the HSA Contribution Planner to determine the amount that will be the best for you to contribute into your Sentinel HSA next year. The tool will walk you through a series of questions related to your typical annual expenses and will pair that with your longer-term goals to provide guidance.

Both of these tools are available to you today via your Sentinel online account. For instructions on how to access your account, check out this helpful tutorial:
